

1. In your Marketo account, go to Admin, click on the Security menu item and select Users & Roles, in the panel on your left. Click on the Roles menu tab. On the Roles submenu go to New Role.

2. You will now need to set a Role Name. Next you will need to give this Role permissions. In the Permissions box, expand the Access API Menu and select Read-Only Assets and Read-Write Assets. Click Create.

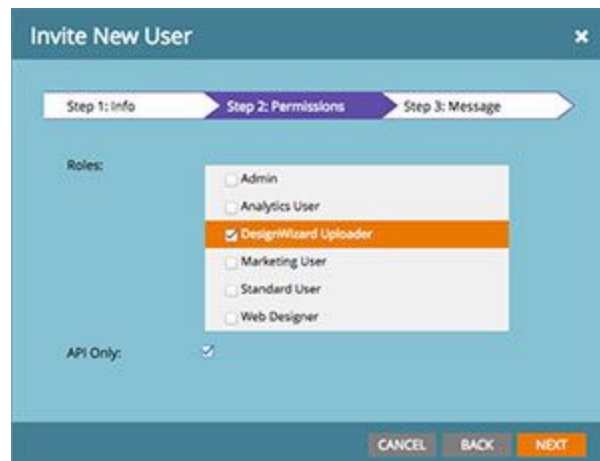

3. The User has now been created. Next, go to the Users tab in the Users & Roles section. From here click on the Invite New User option.

4. Enter an Email address, First Name and Last Name, then click Next.

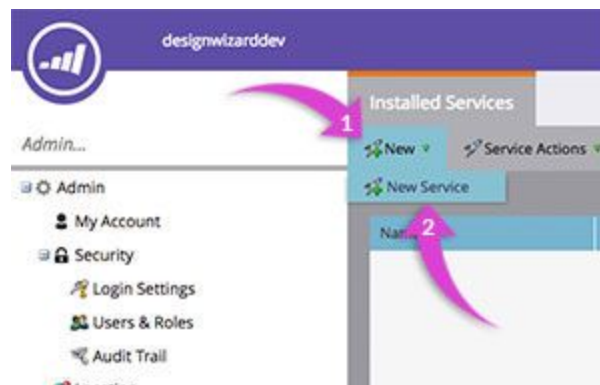

A screenshot of the 'Invite New User' form. The form has a title bar with 'Invite New User' and a close button. Below the title bar is a progress indicator with three steps: 'Step 1: Info' (active), 'Step 2: Permissions', and 'Step 3: Message'. The form contains the following fields: 'Email' with the value 'dwuploader@designwizard.com', 'First Name' with the value 'Dw', 'Last Name' with the value 'Uploader', 'Reason' with an empty text area, and 'Access Expires' with the value 'Never'. At the bottom right of the form are two buttons: 'CANCEL' and 'NEXT'.

5. In Step 2, select the Role you have just created - Design Wizard Uploader, and check the API Only box. Click on Next. In Step 3, click Send to complete the process.

The screenshot shows a dialog box titled "Invite New User" with a close button (X) in the top right corner. At the top, there is a progress indicator with three steps: "Step 1: Info", "Step 2: Permissions" (which is highlighted in purple), and "Step 3: Message". Below the progress indicator, there is a section labeled "Roles:" containing a list of roles with checkboxes: "Admin", "Analytics User", "DesignWizard Uploader" (which is selected and highlighted in orange), "Marketing User", "Standard User", and "Web Designer". Below the roles list, there is a section labeled "API Only:" with a checked checkbox. At the bottom of the dialog, there are three buttons: "CANCEL", "BACK", and "NEXT".

6. We're almost there! Go to the Admin menu in the panel on the left of your screen. Expand the Integration menu item and click on Launchpoint. From here click on New and then New Service..

7. Enter a Display Name and Description. Select Custom as Service and select the API Only User you have created. Click Create.

New Service [X]

Display Name: * DesignWizard Uploader

Service: * Custom

Settings

Description: * Service to upload images from DesignWizard

API Only User: * dwuploader@designwizard.com

CANCEL CREATE

8. Click on View Details of the service you have added. Copy and save the Client Id and Client Secret as shown below.

Details [X]

Client Id: 4c3dbd0d-dcda-44b8-9ffe-b434f699a53e

Client Secret: NYUll1AqaamtgBoU1Kaew@h2GqUtBfOQ

Authorized User: dwuploader@designwizard.com
