# Marketo Integration

Connect to your Marketo account to pull in existing metadata (tags) related to campaigns and assets, and make them available within Marketing.AI when planning and creating content. The integration will also pull in analytics data collected by Marketo related to asset performance and provide for viewing within Marketing.AI along with the appropriate context.

For any questions on setting up this integration, simply hit the '?' button in the bottom right of your screen for immediate assistance or e-mail us at support@marketing.ai.

Integrate Marketo via the Marketo REST Interface. For instructions please see: <http://developers.marketo.com/documentation/rest/custom-service>

Client ID

Client Secret

To determine the API Endpoint, see the following instructions: <http://developers.marketo.com/documentation/rest/endpoint-url/>
